Transient message displaying method e.g. for banner advertisements,
 involves capturing and storing screen images having at least one
 multimedia object with transient messages at different time intervals
 Patent Assignee: INT BUSINESS MACHINES CORP (IBMC)
 Inventor: COOPER M R ; DUTTA R ; PATEL K C
 Number of Countries: 001 Number of Patents: 001
 Patent Family:

Priority Applications (No Type Date): US 2001843063 A 20010426
 Patent Details:

Patent No	Kind	Lan Pg	Main IPC	Filing Notes
US 20020161794	A1	16	G06F-007/00	

Abstract (Basic): US 20020161794 A1

NOVELTY - Several **screen images** having at least one multimedia object containing transient messages rendered on a client display, are captured independently of the user action at different time intervals. Each image is stored, and subsequent rendering of at least one of the stored images is enabled in response to the user selection.

DETAILED DESCRIPTION - INDEPENDENT CLAIMS are included for the following:

- (1) Transient message display system; and
- (2) Transient message display program.

USE - For displaying transient messages such as banner advertisements or messages appearing in web pages.

ADVANTAGE - Enables automatic capture of storage of **screen images** when the multimedia objects are initially rendered to the screen, without user interaction. Facilitates users to replay some or all of the transitory content that has been missed. Also enables the content to be replayed at a speed different from that original rendering speed, thereby enabling persons with cognitive disability to replay the content at a slower speed.
